The Company

BTH (Hungary) is part of the group BT (Germany) and is a dynamically growing company producing plastic fittings for plastic pipe systems. The fittings are produced through injection moulding from U-PVC, PP and Polystyrene.

Founded in 1998 BTH developed itself into a well-known plastic processing company in Hungary through engagement and client orientation using the innovation and expertise of the group BT (Germany). Besides the extensive national relations international activities in Slovakia, Romania, Bulgaria, Serbia, Ukraine and Russia contribute to the success of BTH.

The quality of our products and the service to our customers are the key to our success. This close cooperation with our customers will also be the major guideline for BTH in the future.

The Products

Our injection moulded PVC and PP sanitary fittings are mainly designed for the use of sanitary wastewater indoors and for raingutter systems. Our fittings with inserted BL rings can be delivered quickly from stock.

ISO 9001:2000 certification and our constant quality control guarantee quality at the highest level.
